Kromet designs and manufactures custom decorative metal trim. We extrude, roll form, fabricate and assemble aluminum and steel into a variety of structural designs to meet specific needs. Our finishing capability includes powder painting, anodizing, electrophoresis and a range of brushing and polishing techniques.

Appliance handles, grab handles, luggage racks, air diffusers for passenger rail and subway cars, solar panel frames, and a variety of trim and structural trim components are among our successful range of products.

Our customers include the global leaders in the home appliances, solar energy, rail transportation and office furniture industries.
